PROFILE

Third-year Game Development student at HEAJ focused on gameplay programming. Experienced with Unreal Engine 5, Unity, C++, C#, Python and Blueprint through academic and personal projects. Released a complete game on Steam and seeking a Game Programmer internship starting January 2027.

EXPERIENCE & ACHIEVEMENTS

Game Development - HEAJ 2024 -2027 *Academic work*

Implemented gameplay systems in C++/Blueprint (UE5), including custom movement, camera and physics interactions.

Worked on A* pathfinding, turn-based gameplay, custom movement, physics and camera systems.

Detailed technical case studies and gameplay footage available in the portfolio.

Lampyris Moon - Released Game *May 2026*

Solo-developed and released a narrative horror game on Steam, from concept to publishing.

Built gameplay systems, enemy AI, dialogue systems and puzzles in Unity/C#.

Handled store page setup and marketing assets independently.
